

Chapter 5: Part 3: Optional Assignment

There are four courses taught in this semester with these course codes: **IBDE200**, **IBDE202**, **IBDE204**, and **IBDE206**. Students can enrol in ALL of the courses or in selected courses. There are several instructors, and each instructor may teach more than one course. Instructors will need to keep track of student grades (A, B, C, D, and F) for each student in their class. This database will be used to **generate a grades report for each student**. It will also be used to look up the **instructor** of a course. Most importantly, this database will be used to keep track of **student enrolment** in courses.

Breakdown of info obtainable from above:

1. List of instructors per course
2. List of students per course
3. List of courses by instructors and students
4. List of students per grade per course
5. List of course per grade to perhaps find out success rate?
